

LINIA®

SaaS and services for Automated Inspection

We are revolutionising the way assets are monitored and maintained with our LINIAair, LINIApower and LINIAinsights software tools. From drone flight planning to data capture and analytics, we cover the whole process.

Axpo supports you in the maintenance and investment planning of your assets – with the software tools LINIApower for flight plan development, LINIAair for automated data acquisition and LINIAinsights for asset analysis.

LINIApower is a web-based platform for the generation of drone flight routes based on digital models. Reliable and precise flight routes provide the basis for safe and high quality inspections.

LINIAair drone software enables efficient and secure data acquisition. LINIAair makes it easy, fast and safe to fly the routes generated by LINIApower.

LINIAinsights is a web-based platform that allows visualisation and management of digital assets and access to relevant information.

Linia Automated Inspection

Revolutionise grid inspections with intelligent drone technology

LINIApower

LINIAAir

LINIAinsights

Automate the inspection process

With automated drone inspection, we offer operators of critical infrastructure a proven process. Our software for data collection and analysis brings enormous advantages. As a result, maintenance budgets can be used in the right places and security of supply is increased.

Your benefits

- Automated process
- Standardised data
- Repeatable inspections
- Precise flight routes

Who we address

Our solutions are aimed at electricity grid operators and companies that provide them with inspection services.

What we deliver

Software: Our LINIApower and LINIAinsights platforms and LINIAAir drone software are available as Software-as-a-Service (SaaS) solutions.

Services: Our services cover all steps of automated inspection – from flight route generation and drone flights, including obtaining the necessary flight permits, to data analysis and reporting.

Modularity: Our solutions have a modular structure and can be tailored to meet your specific requirements.
