

# Energy Mix 2025

In accordance with Decree 6/2008 (VI. 18.) of the Hungarian Energy and Public Utility Regulatory Authority (KHEM), the share of primary energy sources used to generate the electricity sold to you in 2025 by Axpo Energy Romania SA is shown in the diagrams below.

|                                 |                |
|---------------------------------|----------------|
| <b>Renewable energy sources</b> | <b>18,000%</b> |
| Geothermal                      | 0,004%         |
| Biomass and Municipal RE        | 0,916%         |
| Solar                           | 13,507%        |
| Wind                            | 1,527%         |
| Water                           | 2,060%         |
| <b>Nuclear energy source</b>    | <b>13,700%</b> |
| <b>Fossil energy sources</b>    | <b>68,300%</b> |
| Natural gas                     | 38,525%        |
| Oil                             | 1,130%         |
| Coal                            | 24,730%        |
| Lignite                         | 0,215%         |
| Other fossil fuels              | 3,659%         |
|                                 | 100.0%         |

CO<sub>2</sub> impact      134,9g CO<sub>2</sub>/kWh

Nuclear impact      0,0026 g/kWh
