## Beznau nuclear power plant: Unit 1 back on the grid

**Unit 1 of the Beznau nuclear power plant is back on the grid after being offline for several weeks. The investigations into the feedwater tank have been completed.**

On 28 September, Axpo took Unit 1 of the Beznau nuclear power plant off the grid for repairs to a power cable. These works went according to plan. Nevertheless, the restart was delayed due to the newly available results of an inspection of the feedwater tanks in the non-nuclear part of the plant. These made further clarifications necessary (see media release of 28 September).

These clarifications have now been completed. The inspection confirmed the safety of the feedwater tanks. The supervisory authority ENSI has been informed of the results.

### About Axpo

Axpo is driven by a single purpose – to enable a sustainable future through innovative energy solutions. Axpo is Switzerland's largest energy producer and an international leader in energy trading and the marketing of solar and wind power. Axpo combines the experience and expertise of more than 7,000 employees who are driven by a passion for innovation, collaboration and impactful change. Using cutting-edge technologies, Axpo innovates to meet the evolving needs of its customers in over 30 countries across Europe, North America and Asia.
