Axpo in Poland confirms Krzysztof Włodyga as Head of Origination

Axpo in Poland has confirmed the appointment of Krzysztof Włodyga as Head of Origination, having led the company's origination team since March this year. In this role, Włodyga is responsible for further developing cooperation with corporate and industrial customers, as well as renewable energy producers.

Leading Axpo in Poland's origination team as Acting Head since March 2026, Krzysztof Włodyga's permanent appointment is a natural continuation of his responsibilities. Working with corporate and industrial customers and renewable energy producers, the origination team develops solutions tailored to their needs.

During nearly ten years with Axpo, Włodyga has gained wide experience spanning trading, commodity markets and the creation of energy products for the company's biggest customers. He has also been involved in projects related to the energy transition and the development of innovative solutions for the renewables market, including responsibility for signing the largest contract for the optimisation of an energy storage facility in Central and Eastern Europe.

Axpo in Poland Managing Director Mateusz Marczewski said: "Krzysztof has consistently delivered very strong commercial results during his time at Axpo and played a significant role in developing our origination business. He knows our customers, the market and the specifics of this business exceptionally well. Krzysztof's experience and achievements to date leave me in no doubt that he's the right person to lead our Team through the next stage of its development."

Commenting on his appointment as Head of Origination, Włodyga said: "I'm delighted to be confirmed in this role and look forward to the challenges and opportunities ahead. Our origination team will continue to develop solutions that best respond to the ways in which the energy market and our customers' businesses are changing, connecting their needs with our market insight and the capabilities offered by Axpo's portfolio."

Włodyga graduated from the Faculty of Building Services, Hydro and Environmental Engineering at the Warsaw University of Technology and is a certified commodity broker on the Polish Power Exchange. His work combines technical expertise with many years of experience gained directly in the energy and commodity markets.
